La verdad es que le quiero decir a Milet y yo discrepo de dónde saca qué se hubiera reducido a 10.000 la cantidad de muertes si se hubieran hecho las cosas mediocres. ¿Tenés una calculadora a mano? ¿Cuántas personas murieron en el mundo de coronavirus el año pasado? No, no me lo sé. 1.780.000, pone 1,78. ¿Cuántas personas viven en el planeta Tierra, Nacho? Milenio. 7.800 millones, tenés que hacer. 1,78 dividido 7.800. Eso es el 2 en 10.000. Bueno, multiplicá por 45. Me da 0.010. Bueno, te da 10.000. Ahora conociendo los números, Nacho, decime qué opinás. No, no estoy de acuerdo. Ah, bueno, está bien. Listo, vamos a discutir preferencias, vamos a discutir románticamente. No, no es preferencia. No, no, déjeme hablar. Los datos son claros. Argentina, hay 27 países... ¿Cuántos países hay en el mundo, Nacho? Hay 27 países que están peor que la nega. No sabés nada. discutir románticamente. No, no es preferencia. No, no, déjeme hablar. Los datos son claros. Argentina, hay 27 países... ¿Cuántos países hay en el mundo, Nacho? Hay 27 países que están peor que la nega. No sabés nada.
